Problem Statement

Many readers face difficulty in discovering books, comparing categories, and purchasing books through a simple and user-friendly platform. Traditional bookstores have limited accessibility, while many online platforms are complex or lack personalized browsing features.

After discussing different project ideas, the team selected the Nightjar & Co. – MERN BookStore because it addresses these challenges by providing an easy-to-use online bookstore with secure authentication, search, category filtering, cart management, and order placement.

Step 2: Brainstorm, Idea Listing and Grouping

The team generated multiple ideas before finalizing the project features. Similar ideas were grouped together to identify the most valuable functionality for users.

Ideas Generated

Category	Ideas
User Features	Login, Registration, Profile
Book Features	Browse Books, Search Books, Categories
Shopping	Cart, Checkout, Orders
Admin	Add Books, Update Books, Delete Books
Security	JWT Authentication
Technology	MongoDB, Express.js, React, Node.js

Step 3: Idea Prioritization

The team evaluated all proposed ideas based on importance, feasibility, and user value. High-priority features were selected for the first version of the application.

Feature	Priority
User Authentication	High
Book Catalog	High
Search & Filter	High
Shopping Cart	High
Checkout	Medium
Book Reviews	Medium
Wishlist	Low
AI Recommendation	Low
